## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-10 have been allowed over the prior art of record.
2. The following is an examiner's statement of reasons for allowance: The prior art of record, taken alone or in combination, fails to teach or fairly suggest: a ball bearing actuation mechanism for a vending machine, said mechanism comprising: a housing having an interior chamber, outlet and overflow discharge openings and an inlet passage; a gauge wheel rotatably mounted in said interior chamber; a retainer wall; and means for rotating said gauge wheel; as set forth in claim 1.

While the prior art of record teaches various ball counting and/or dispensing devices, the prior art of record fails to teach or fairly suggest the ball bearing actuation mechanism including a housing having outlet and overflow discharge openings and an inlet passage; and the specific structure of the gauge wheel, retainer wall and the means for rotating the gauge wheel as recited in claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Waring (US 5,372,277), Hooghiemstra et al (US 5,195,652), Roos (US 5,014,877), Shreev (US 3,880,322), Lawrence (US 3,410,453), Charron (US
